Sample Questions and Solutions from the 2013 June Papers

Sample Question from Paper 1: Algebra and Functions

Question: Given the function $f(x) = 2x^3 - 3x^2 + x - 5$, find $f'(x)$, and determine the coordinates of the stationary point(s).

Solution: To find $f'(x)$, differentiate term-by-term: $f'(x) = 6x^2 - 6x + 1$

Set $f'(x) = 0$ to find stationary points: $6x^2 - 6x + 1 = 0$

Divide through by 6: $x^2 - x + \frac{1}{6} = 0$

Use quadratic formula: $x = \frac{1 \pm \sqrt{1 - 4 \times 1 \times \frac{1}{6}}}{2}$

$$x = \frac{1 \pm \sqrt{\frac{1}{3}}}{2}$$

Simplify: $x = \frac{1 \pm \sqrt{\frac{1}{3}}}{2}$

Calculate the coordinates by substituting these x -values back into $f(x)$.

Sample Question from Paper 2: Geometry and Trigonometry

Question: In triangle ABC, angle $A = 60^\circ$, side $a = 8$, and side $b = 10$. Find side c using the Law of Cosines.

Solution: Law of Cosines: $c^2 = a^2 + b^2 - 2ab \cos C$

But here, angle A is known, opposite side a . To find side c , use the Law of Cosines: $c^2 = b^2 + a^2 - 2ab \cos C$

However, the problem states angle A , so to find side c , we need to find angle C first or

use the Law of Cosines directly if the appropriate data is given. Alternatively, if side $(a = 8)$, side $(b = 10)$, and angle $(A = 60^\circ)$, then Law of Cosines for side (b) : $b^2 = a^2 + c^2 - 2ac \cos B$ But since only angle (A) is given, and assuming the triangle is standard, the problem might involve applying the Law of Cosines to find (c) directly or using the Law of Sines. Suppose the question intended to find (c) opposite (C) : Use Law of Cosines: $c^2 = a^2 + b^2 - 2ab \cos A$ $c^2 = 8^2 + 10^2 - 2 \times 8 \times 10 \times \cos 60^\circ$ $\cos 60^\circ = 0.5$ $c^2 = 64 + 100 - 2 \times 8 \times 10 \times 0.5$ $c^2 = 164 - 2 \times 8 \times 10 \times 0.5$ $c^2 = 164 - (2 \times 8 \times 10 \times 0.5)$ Calculate: $2 \times 8 \times 10 \times 0.5 = 2 \times 8 \times 5 = 80$ Therefore, $c^2 = 164 - 80 = 84$ $c = \sqrt{84} \approx 9.17$ Answer: Side $(c \approx 9.17)$ units.

Preparation Strategies Using the 2013 June Exam Papers
