Understanding the Botanical Classification of the Pumpkin

What Is a Fruit?In botanical terms, a fruit is the mature ovary of a flowering plant, typically containing seeds. It develops from the fertilized ovule after pollination and is the means by which many plants disperse their seeds.

Characteristics of a fruit include:

- Developing from the flower's ovary
- Containing seeds
- Usually sweet or savory in culinary use

Pumpkin as a fruit: Botanically classified as a berry called a pepo, which is a type of berry with a hard outer rind. Contains numerous seeds inside its fleshy interior. Develops from the flowering part of the pumpkin plant after pollination.

What Is a Vegetable?In culinary terms, vegetables are edible parts of plants that are not sweet and are typically used in savory dishes. These parts include roots, stems, leaves, flowers, and sometimes fruits.
